Simulated scans against the real cohort

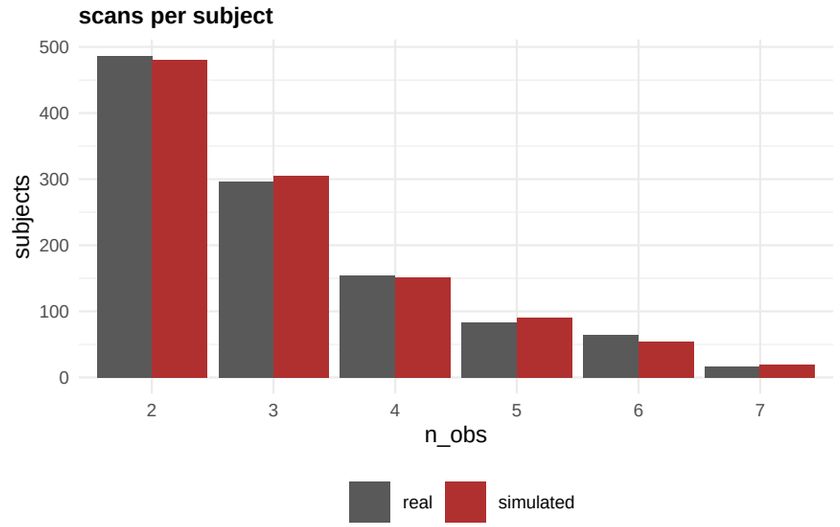

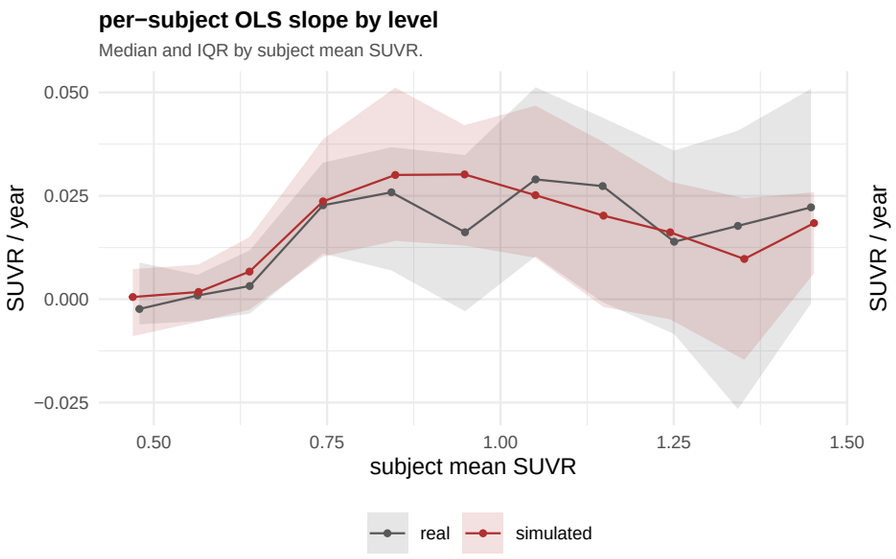

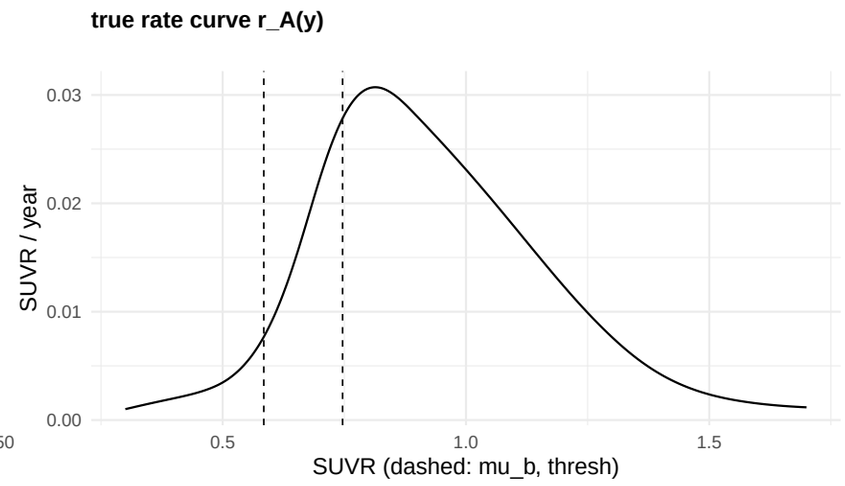

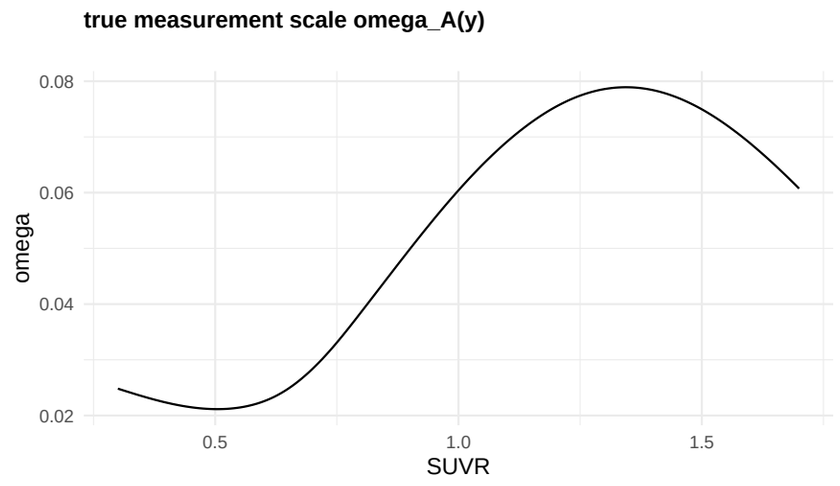

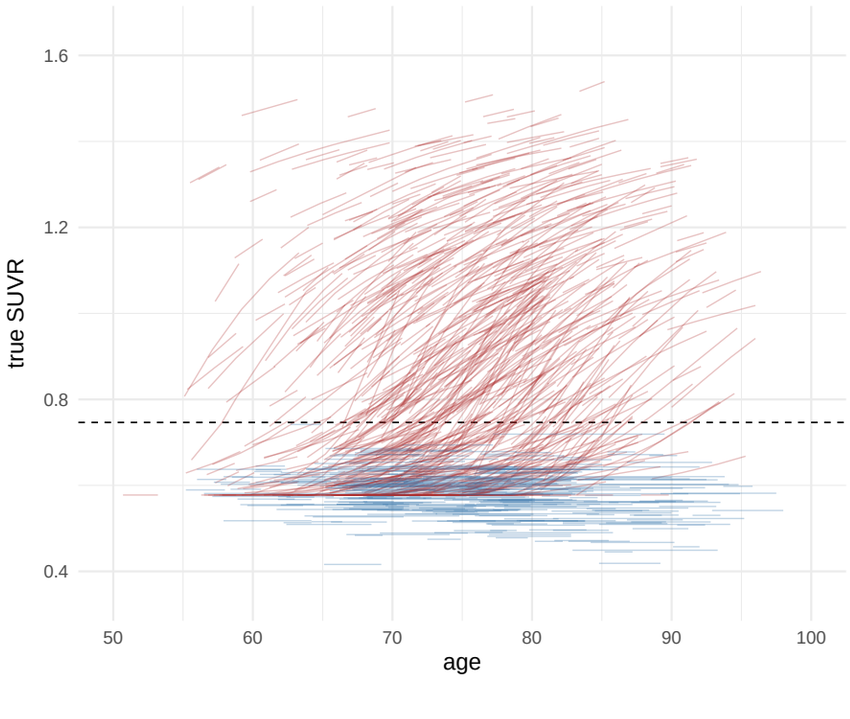

Simulated truth against the fit to the real cohort

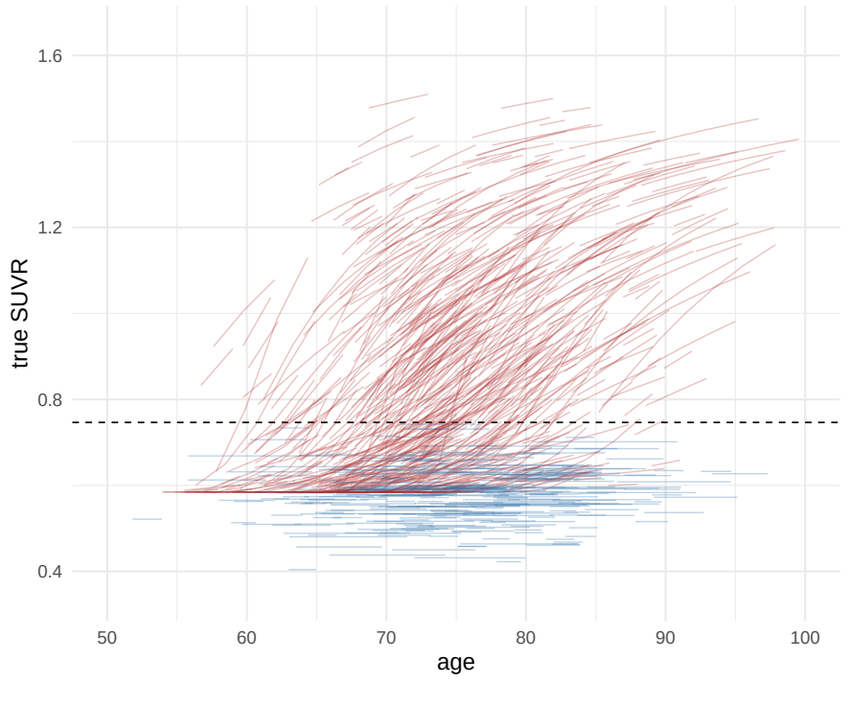

A. Real cohort: fitted true SUVR

One posterior draw; membership sampled.

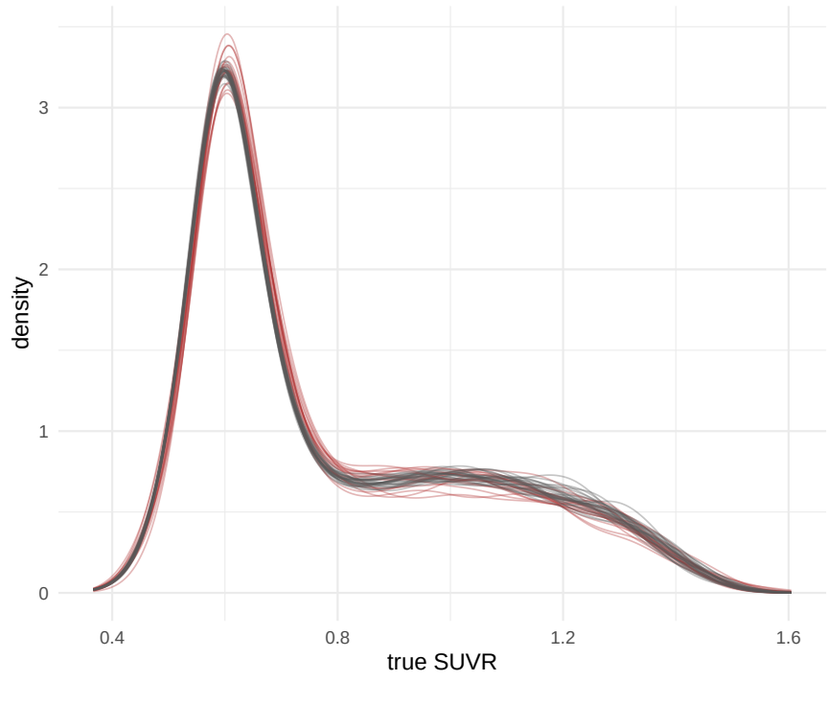

B. Simulated: true SUVR A_ij

This dataset.

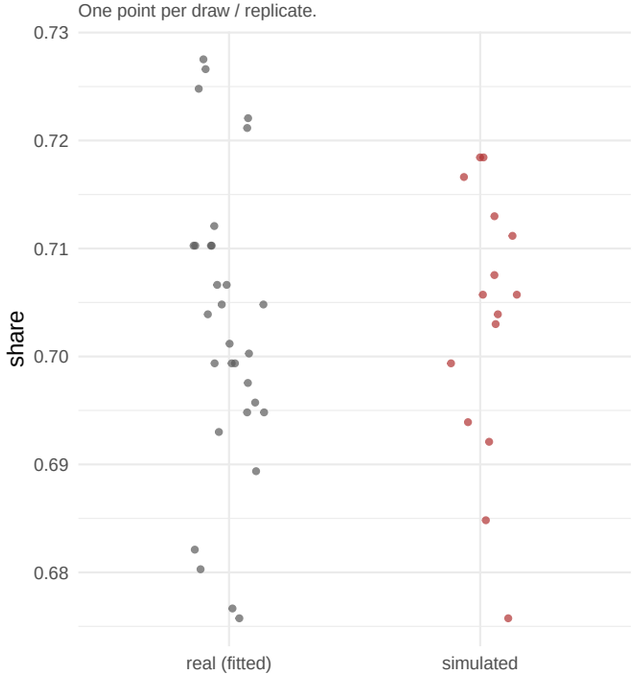

C. True SUVR at every scan

30 posterior draws vs 15 simulated replicates.

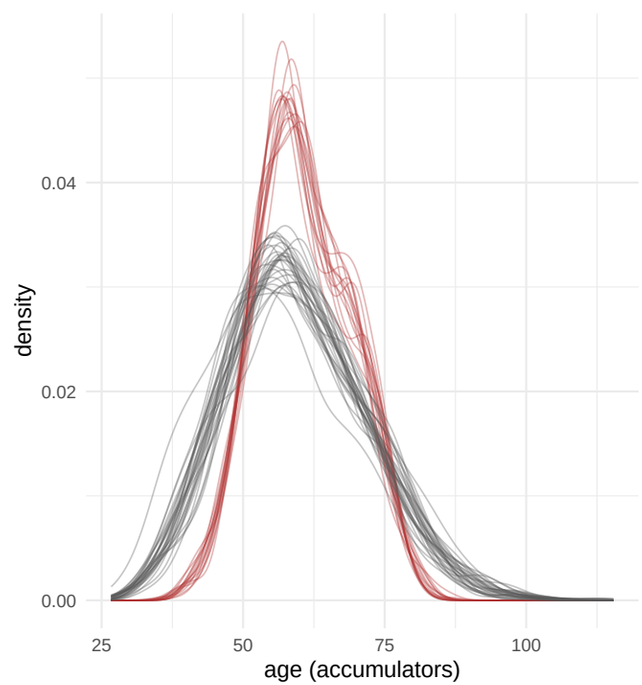

D. Share of accumulators

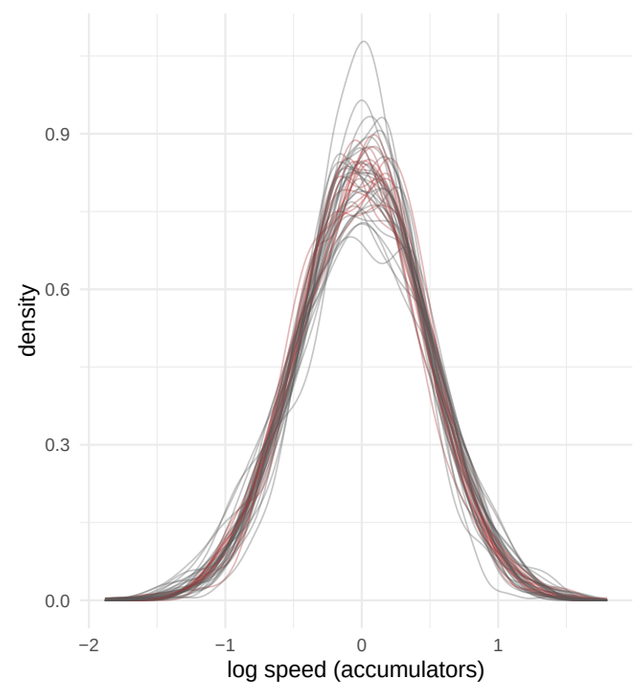

One point per draw / replicate.

E. Onset age alpha

F. Speed delta

G. Non−accumulator level b
